FOREWORD

This Indian Standard (First Revision) was adopted by the Bureau of Indian Standards on 1 February 1989, after the draft finalized by the Timber Stores Sectional Committee had been approved by the Civil Engineering Division Council.

The general requirements for wooden tool handles are covered by IS 620 : 1985 'Specification for wooden tool handles, general requirements (*fourth revision*)'. A series of Indian Standards have been prepared for various hand tools, and for use with these hand tools, a number of standards for corresponding wooden handles have been prepared. These standards are being revised regularly to absorb research data as well as users' experience.

This standard was first published in 1970. In the present revision, clauses pertaining to species of timber and other requirements have been modified and updated.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test, shall be rounded off in accordance with IS 2 : 1960 'Rules for rounding off numerical values (*revised*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Indian Standard

WOODEN HANDLES FOR POWRAHS — SPECIFICATION

(First Revision)

1 SCOPE

This standard covers the requirements of wooden handles for *POWRAHS* conforming to IS 1759 : 1980 'Specification for *POWRAHS* (first revision)'.

2 REFERENCES

The Indian Standards listed below are necessary adjuncts to this standard:

IS No.	Title
IS 620 : 1985	General requirements for wooden tool handles (<i>fourth revision</i>)
IS 707 : 1976	Glossary of terms applicable to timber technology and utilization (<i>second revision</i>).

3 TERMINOLOGY

For the purpose of this standard, the definitions given in IS 620 : 1985 and IS 707 : 1976 shall apply.

4 SPECIES OF TIMBER

4.1 The handles for *POWRAHS* shall be manufactured from any of the timber specified for Class IV handles in IS 620 : 1985.

4.2 The blanks shall be well seasoned (preferably air seasoned) to a moisture content not exceeding 15 percent. They shall be fairly straight grained (inclination of grain not to exceed 1 in 20), free from centre heart (pith), any kind of decay (rot), any type of borer/insect attack, brashness, checks, shakes (except few hair cracks/shakes), split, warp, objectionable knots and sap-wood, except those permitted for finished handles in IS 620 : 1985. Any defects other than those listed above which are likely to adversely affect the life or utility of the handles shall not be permitted.

5 MANUFACTURE

5.1 The handles shall be manufactured from selected blanks to the shape and size as shown in Fig. 1.

5.2 Unless otherwise specified by the purchaser, immediately after inspection, all accepted handles shall be thoroughly soaked in hot (about 90° C) raw linseed oil for one hour and allowed to drain. They shall then be wiped clean with a dry piece of cloth.

6 DIMENSIONS AND TOLERANCES

6.1 Dimensions

The handles shall conform to the dimensions as shown in Fig. 1.

6.2 Tolerances

The following tolerances shall be permissible:

- a) Where the head of the tool fits: +3 mm, and
—0 mm
- b) At all other places : ± 2 mm.

7. OTHER REQUIREMENTS

Workmanship and finish, permissible defects (in addition to those given in 4.2), tests, treatment and moisture content of finished handles shall be as specified in IS 620 : 1985.

8 SAMPLING

The method of drawing representative samples and criteria for conformity shall be as prescribed in IS 620 : 1985.

9 MARKING

Unless specified otherwise, each handle shall be legibly and indelibly marked with the manufacturer's name, initials or recognized trade-mark and the year of manufacture.

All dimensions in millimetres.

Standard Mark

The use of the Standard Mark is governed by the provisions of the *Bureau of Indian Standards Act, 1986* and the Rules and Regulations made thereunder. The Standard Mark on products covered by an Indian Standard conveys the assurance that they have been produced to comply with the requirements of that standard under a well defined system of inspection, testing and quality control which is devised and supervised by BIS and operated by the producer. Standard marked products are also continuously checked by BIS for conformity to that standard as a further safeguard. Details of conditions under which a licence for the use of the Standard Mark may be granted to manufacturers or producers may be obtained from the Bureau of Indian Standards.

Bureau of Indian Standards

BIS is a statutory institution established under the *Bureau of Indian Standards Act, 1986* to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

Copyright

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Director (Publications), BIS.

Revision of Indian Standards

Indian Standards are reviewed periodically and revised, when necessary and amendments, if any, are issued from time to time. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition. Comments on this Indian Standard may be sent to BIS giving the following reference:
